

AI BASED DISCOUSE FOR BANKING INDUSTRY

The screenshot displays a Jupyter Notebook titled 'Untitled8.ipynb' in a web browser. The notebook contains three code cells. The first two cells define a Flask application with a single route. The third cell executes the application, showing a warning about the development server and a SystemExit error. The output also includes a search for 'SystemExit: 1' on Stack Overflow.

```
[1] from flask import Flask, render_template

[2] app = Flask(__name__, template_folder="template")

@app.route("/")
def Chatbot():
    return render_template("index.html")

if __name__ == "__main__":
    app.run(debug=True)
```

* Serving Flask app " __main__ " (lazy loading)
* Environment: production
WARNING: This is a development server. Do not use it in a production deployment.
Use a production WSGI server instead.
* Debug mode: on
INFO:werkzeug: * Running on <http://127.0.0.1:5000/> (Press CTRL+C to quit)
INFO:werkzeug: * Restarting with stat
An exception has occurred, use %tb to see the full traceback.

SystemExit: 1
